## ABSTRACT

Designed to answer the most frequently asked questions about the Washington Community Colleges (WCC), this report provides information about students, courses, faculty, staff, and facilities for the 1991-92 academic year and historical data from 1987-88 through 1991-92, where available. While the state's community and technical colleges were merged into a single system in fall 1991, data for technical colleges is provided only for facilities in this report. Following a brief history of Washington's community and technical college system, the five sections of this report examine enrollments and student demographics; courses offered, including full-time equivalents (FTE) by funding source and by college; community college personnel; facilities; and expenditures. Highlights of the report include the following: (1) during 1991-92, the WCC served 358,204 unduplicated headcount students; (2) 21% of the WCC student population were minorities, compared to a state minority population of 13%; (3) in 1991-92, WCC expenditures totaled \$408 million from all revenue sources, including \$377 million in state funds; (4) WCC capital appropriations for 1991-93 were \$109 million; (5) the 32 campuses in the system occupy a total of 2,879 acres of land; (6) the WCC enrolled the equivalent of 107,073 full-time equivalent (FTE) students each quarter in 1991-92, of whom 93,798 were in state-funded courses; and (7) in 1991-92, the WCC employed 7,553 state-supported, FTE faculty, administrative, and exempt, classified, and other professional staff, representing a 3.7% increase over the previous year. Detailed data tables are included. (PAA)

## HIGHLIGHTS OF 1991-92

- The Washington community colleges served 358,204 unduplicated headcount students in 1991-92. An unduplicated headcount counts each student enrolled only once, even if the student had enrolled in more than one course in the year.
- The racial composition of the student population was more diverse than that of the state as a whole (21 percent students of color at community colleges, 13 percent in the state population).
- The student population was more female (55 percent of those reporting gender) than the state's adult population, typical of community and technical colleges nationally.
- System expenditures totalled \$377 million in state funds in 1991-92. Community colleges expended a total of \$408 million from all revenue sources.
- Capital appropriations for 1991-93 were \$109 million. The 32 college campuses occupy 2,879 acres of land.
- The community colleges enrolled the equivalent of 107,073 full-time equivalent students (FTE) each quarter in 1991-92. That was 616 FTE more than in 1980-81, the previous high. Of the total, 93,798 of the FTEs were in state funded courses, including 3,859 as "excess enrollments."
- In 1991-92, 7,553 state supported, full-time-equivalent faculty, administrative, exempt and classified and other professional staff were employed in Washington community colleges, compared with 7,287 FTE the previous year, a 3.7 percent increase.

## INTRODUCTION

### THE REPORT

The Academic Year Report 1991-92 provides a snapshot of enrollments in community colleges in the past academic year. The report addresses the most frequently asked questions related to expenditures, personnel and students. The community and technical colleges were merged into a single system in fall 1991. Except for facilities data, data for technical colleges was not available for this reporting year.

The primary source of information for this document is the State Board for Community and Technical College's (SBCTC) Management Information System (MIS).

### THE WASHINGTON COMMUNITY AND TECHNICAL COLLEGE SYSTEM

Washington's Community and Technical College Act of 1991 provides for a state system of community and technical colleges separate from both the public secondary schools and four-year institutions. The act requires that the colleges "offer an open door to every citizen, regardless of his or her academic background or experiences, at a cost normally within his or her economic means" (RCW 28B.50.020(1)).

Each college district is required to "offer thoroughly comprehensive educational, training and service programs to meet the needs of both the communities and students served by combining, with equal emphasis, high standards of excellence in academic transfer courses; realistic and practical courses in occupational education, both graded and ungraded; community services of an educational, cultural and recreational nature; and adult education" (RCW 28B.50.020(2)). College districts containing only technical colleges are exempted from the requirement to offer academic transfer courses. Each college is governed by a board of five trustees appointed to five-year terms by the governor with the consent of the Senate.

Washington's first junior college was started in 1915 in Everett when 42 students began a one-year college program on the top floor of Everett High School. It was closed in 1923 for lack of students. Centralia College, the state's oldest existing community college, opened in 1925. It was followed by Skagit Valley College in 1926, Yakima Valley College in 1928 and Grays Harbor College in 1930. By 1941, eight junior colleges were operating in Washington, all locally administered and locally funded. Combined enrollment was approximately 1,000.

Meanwhile, in 1930 the Seattle School District opened Edison Vocational School, the first true, public vocational school in the state. The Spokane School District followed suit in 1939 with establishment of the Spokane Trade School. Both schools eventually became community colleges. The oldest existing vocational technical institute, Tacoma's Bates VTI, opened in 1940. Subsequently, VTIs opened in Clover Park, Pasco, Renton, Vancouver, Kirkland (Lake Washington), Olympia and Bellingham. The VTIs in Pasco, Vancouver, and Olympia eventually became community colleges.

Between 1925 and 1941, there were three attempts to provide state support for junior colleges. State support was provided for the first time by the 1941 Legislature; however, that act restricted the number and location of junior colleges, prohibiting their establishment in counties having either a public or private four year institution. In 1945, junior colleges were made a part of their local school districts and supported through their funding, as was the case with vocational technical institutes until 1991.

In 1961, the restrictions against expansion of community colleges were removed by the legislature and junior colleges were designated as "community" colleges. This term had first appeared in a report to President Harry Truman from his Commission on Higher Education in 1947.

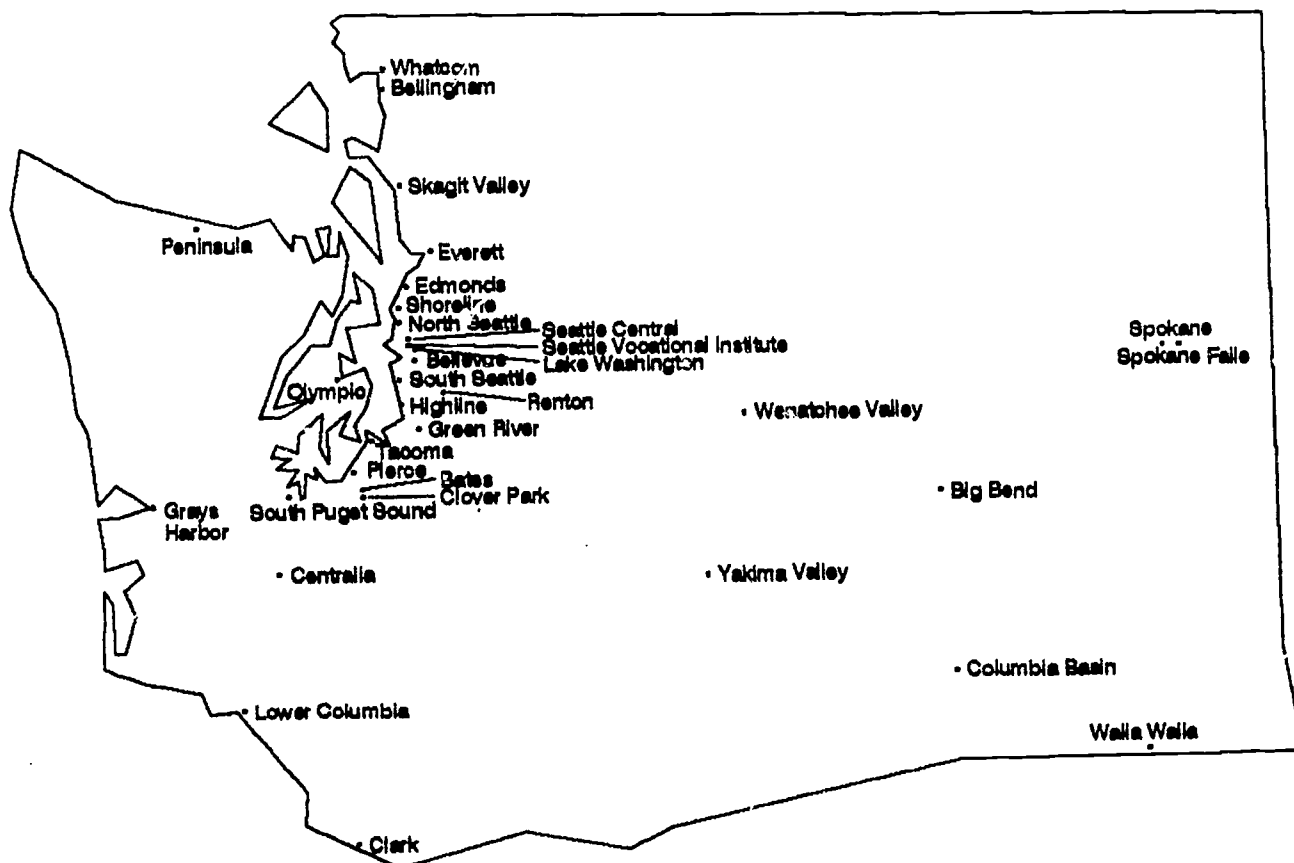

The financing of community colleges was separated from that of local school districts in 1963, and in 1965 the legislature declared that it intended to establish a separate, independent community college system. Based on the recommendations of the Arthur D. Little Company, the 1967 Legislature adopted the Community College Act of 1967, which was signed on April 3 of that year.

The structure of the community college system remained largely intact until 1991 when, as part of the Work Force Training and Education Act, the legislature amended the Community College Act of 1967 and redesignated it as the Community and Technical College Act of 1991.

The state's five remaining public vocational technical institutes were designated as "technical colleges," removed from the jurisdiction of their local school districts, and merged with the community college system. Each technical college was provided with its own college district and a board of trustees. Each technical college district overlaps the districts of neighboring community colleges. The State Board for Community College Education was renamed the State Board for Community and Technical Colleges by the 1991 act.

The Community and Technical College Act of 1991 also brought the Seattle Vocational Institute (SVI) into the Seattle Community College District. It had been the Washington Institute of Applied Technology since 1987 when it was established by the legislature in a facility previously occupied by the Seattle Occupational Industrialization Center before it closed. SVI serves economically disadvantaged people in Seattle's Central district, providing job-related training for adults and contract training for local businesses.

## WASHINGTON COMMUNITY AND TECHNICAL COLLEGES

**ENROLLMENTS  
AND  
STUDENT DEMOGRAPHICS**

# INTRODUCTION TO ANNUAL STUDENT DATA ACADEMIC YEARS 1987-88 TO 1991-92

Community colleges enrolled 358,204 students in 1991-92. The majority of those students (66 percent) were enrolled in courses supported with state funds in addition to the tuition paid by the student or their sponsor (employer or human services agency or organization). Ten percent of all students were enrolled in contract courses where an employer or human services agency paid the entire cost of instruction with no reimbursement from the state.

The 1991 Legislature authorized additional state supported enrollments for community colleges for 1991-92 and authorized a limited and declining number of "excess enrollments" above the state funded enrollment level. The authorization of "excess enrollment", previously called "contemporary contracting", resulted in a change in the reporting of enrollments. Prior to this year, such enrollments had been included in the contract or student funded category. The substantial decline in contract supported headcount was entirely due to the reporting change. The 1991 Legislature also authorized self supported summer enrollments for community colleges. A small number of colleges participated in that program. Colleges that offered summer self-support classes had more enrollment authority to spread between the fall, winter and spring terms.

State Supported Students: Students enrolled in at least one course funded completely or in part by legislative appropriations of state funds. Includes "excess enrollments" allowed by legislature.

Contract Supported Students\*: Students enrolled in courses funded by grants and contracts with external organizations and who were not enrolled in any state supported courses.

Student Funded Students: Students enrolled only in non-degree courses funded entirely through fees charged to the students.

Note: Most students enroll exclusively in one of the three types of courses: state supported, contract supported or student funded.

\* State supported at community colleges include "excess enrollment" students. Student funded includes summer self-support. Running Start students were not included.

## STUDENTS BY PURPOSE FOR ATTENDING ACADEMIC YEAR 1991-92

Students enroll for many purposes. In 1991-92 more than 69,000 students were enrolled with the goal of transfer to a four-year Institution. Transfer-bound students were typically young (median age 19) and enrolled full-time (78 percent).

More than 99,000 students were enrolled for workforce training. Of these, about 51 percent were enrolled to prepare for a job, while 48 percent were upgrading job skills. Workforce training students were older (median age 27) and 45 percent enrolled full-time.

The 7,873 developmental FTE taken by workforce training and transfer students to improve their basic academic skills are included in the transfer and workforce FTEs below.

Students enrolled for basic skills purposes were in ABE, ESL, GED or high school completion courses as their final goal. Basic skills students were older than transfer students, but younger than workforce training students. They tended to be enrolled part-time.

Some 90,000 students did not specify a goal when they enrolled, enrolled to prepare for retirement, or to develop parenting and consumer homemaking skills. Most of these students enroll part-time for one or two quarters and thus account for only a small part of the FTE.

**STUDENTS BY FULL-TIME AND PART-TIME STATUS  
STATE AND CONTRACT SUPPORTED  
ACADEMIC YEARS 1987-88 TO 1991-92**

While part-time students in state funded and contract supported courses were in the majority - 167,807 or 61 percent of the total in 1991-92 - the number of part-time students has not been increasing while full-time student numbers have increased over the past five years.

The faster growth rate for full-time students counters the national trend toward greater growth among part-time students. It is likely that the difference among Washington's community colleges is due to enrollment limits rather than demand for part-time enrollment. As colleges attempt to meet the growing enrollment demand within FTE limits, part-time students are most likely to find the courses they are seeking to be full by the time they can register for classes.

Only two colleges -- Spokane and Tacoma -- served more full-time than part-time students. Peninsula enrolled 77 percent of its students on a part-time basis.

Note: Unreported gender was prorated. Excludes Running Start students.

**RACE AND ETHNIC BACKGROUND:** Community colleges serve a racially and ethnically diverse population. In 1991-92 the enrollment was 21 percent people of color compared to a state population in 1991 of 14 percent people of color.

The Hispanic enrollment exceeded state population figures primarily because of enrollments in English-as-a-Second-Language classes required by the Immigration Reform and Control Act (IRCA).

## **COURSES OFFERED**

## COMMUNITY COLLEGE FTE BY FUND SOURCE ACADEMIC YEAR 1991-92

The 358,204 students enrolled at community colleges took 107,073 FTE during academic year 1991-1992. An annual FTE equals 45 credit hours of community college instruction or generally 3 classes per quarter for three quarters.

Courses funded through state support and tuition are regarded as **state supported**. When students, employers or social service agencies pay for the tuition in a state supported course, they are paying for 23 percent of the course at community colleges. The state pays the major portion of the cost by direct allocation of state funds to the State Board for Community and Technical Colleges (SBCTC). SBCTC then distributes those funds on an equitable basis to each college.

**Excess** enrollment are those FTEs in classes taught by state supported faculty authorized above the enrollment level. See page 14 for additional information.

Courses in which no state funds are used to cover costs of instruction are regarded as either contract or student funded.

**Contract funded** courses are paid for by an enterprise such as an employer or social service agency for the benefit of its employees or clients. Colleges offer contracted instruction for the Washington Department of Correction at its major correctional facilities and U.S. military.

Colleges contract with social service agencies to provide their clients with job training or basic skills education. These contracts include Job Skills Program (JSP) grants from the Workforce Training and Education Coordinating Board to provide training to new and current employees at new and expanding businesses in Washington. An example of the grants this past year include training of Shelter Dynamics of Spokane employees in pre-fabricated housing construction and quality control training for employees of Applied Pacific Circuits in Redmond.

Colleges also contract directly with employers to meet their employee training need. Such contracts meet the customized training needs of employers.

Included in the contract FTE were 299 FTE in the pilot Running Start program at five colleges.

**Student funded** class cost are paid entirely by the individuals who enroll. Student funded offerings include avocational courses such as foreign language for travelers and workforce training related such as microcomputer applications.

For the first time in the summer of 1991, community colleges were authorized to offer college-level courses on a self supporting basis outside their state enrollment limits. Eight colleges did so for 1,135 annual FTE.

Community College FTEs by Fund Source  
1991-92

# FTES BY FUNDING SOURCES COMMUNITY COLLEGES

The 1991 Legislature authorized additional state supported enrollments for community colleges for 1991-92 and authorized a limited and declining number of "excess enrollments" above the state funded enrollment level. The authorization of "excess enrollment", previously called "contemporary contracting", resulted in a change in the reporting of enrollments. Prior to 1991-92, such enrollments had been included in the contract or student funded category. The substantial decline in contract supported FTEs between 1990-91 and 1991-92 was entirely due to the reporting change. The 1991 Legislature also authorized self supported summer enrollments for community colleges. The increase in student funded FTE was primarily due to summer self support.

# ANNUAL FTES BY ACADEMIC, VOCATIONAL AND BASIC SKILLS/DEVELOPMENTAL ACADEMIC YEAR 1991-92

The community colleges devoted 34 percent of their course effort (as measured by FTEs) to vocational courses, 49 percent to academic courses and 17 percent to basic skills and developmental courses. These percentages should not be confused with the transfer, workforce training or basic skills effort described on page 5 which are based on student purpose, not course type. Workforce training students enroll in vocational, academic and developmental courses, thus their total FTE is different than the vocational FTE reported here. Transfer students also enroll in developmental courses and vocational classes.

Community colleges have been able to increase their course offerings as they have been allocated more state funds, allowed to "excess enroll", and contracted more classes with employers and government agencies. The rate of growth in community colleges has been different for the three major course areas. Academic courses grew 20 percent over the past five years. Basic skills and developmental courses grew 13 percent, primarily due to growth in Adult Basic Education (ABE).

As colleges have addressed the growing workforce training needs, vocational course offerings have increased slightly in the last two years, for a total growth over the five year period of 3 percent. This lesser growth in vocational FTE courses stems from the high cost of vocational training. Given the level of state funding, colleges have been able to add only some of the vocational programs needed by their communities.

**COMMUNITY COLLEGE  
PERSONNEL**

## INTRODUCTION TO PERSONNEL

Community colleges hire staff using state funds, monies from grants, contracts and fees. This report describes only state funded employees. Included in this report are three categories of employees:

- **Classified Staff:** Civil service employees who work under a set of conditions established by the Higher Education Personnel Board.
- **Administrative/Other Professional:** All non-teaching staff exempt from the jurisdiction of the Higher Education Personnel Board civil service system. This includes the top level administrators, program managers and the secretary to the president or chancellor.
- **Teaching Faculty:** Faculty whose main assignment is classroom instruction.

The demographic characteristics of all personnel employed during fall quarter provide a representative picture of the changing nature of the staff.

### STATE AND CONTRACT FUNDED COMMUNITY COLLEGE EMPLOYEES PERCENT FEMALE AND OF COLOR FALL QUARTERS

Race and sex percentage estimates were calculated using 1980 census detail on distribution of labor force by sex and race and population estimates.

**Note:** Percentages may not total 100 due to rounding.

**COMPOSITION OF STAFF ANNUAL FTE  
STATE SUPPORTED  
ACADEMIC YEARS 1987-88 TO 1991-92**

Community college staff activity is measured in terms of full-time equivalents (FTE). A staff FTE represents a non-faculty employee working full-time for 12 months. Faculty are reported as FTE-Faculty (FTE-F). One FTE-F is equal to a nine-month academic year appointment; one FTE-F equals .75 staff FTE. See Appendix D for further definitions.

Community college classified staff provide support for instructional and administrative functions. Classified and administrative/other professional FTE increased 17 percent over the past five years. The number of state supported FTE faculty has grown five (5) percent for the same time period.

**ANNUAL STATE FTE STAFF**

	<u>1987-88</u>	<u>1988-89</u>	<u>1989-90</u>	<u>1990-91*</u>	<u>1991-92</u>

**CLASSIFIED EMPLOYEES ANNUAL FTES BY EMPLOYMENT STATUS  
STATE SUPPORTED  
ACADEMIC YEARS 1987-88 TO 1991-92**

Classified staff provide the record-keeping, communication, maintenance, custodial and other general support functions for the colleges. Classified FTEs have increased commensurate with enrollment increases and changes in record-keeping requirements. Classified staff have also been hired to take on student services and advising functions that had been performed by faculty or not offered in the past.

There were five FTE classified staff for every 10 faculty and administrative/supervisory FTEs in 1991-92.

<b>TOTAL</b>	<b>514</b>	<b>520</b>	<b>554</b>	<b>594</b>	<b>607</b>
% Change		1.2%	6.5%	7.2%	2.2%

Administrative/other professional staff represent eight percent of all state supported FTE employees.

The number of administrative/other professional employees varies among the colleges because of differences in size, organizational structure, and management decisions. Some colleges place functions such as grants and contracts, physical plant, media services, institutional research and planning under the direction of non-faculty exempt staff. At other colleges these functions are performed by classified staff.

In addition, the assignment of faculty chairs differs among the colleges. For example, business education is directed by professional staff members at many colleges, but is divided among several program chairs (faculty) at others.

The largest growth in administrative/other professional staff FTEs by program area has been in instruction and student services.

**ANNUAL TEACHING FACULTY (FTE-F) BY EMPLOYMENT STATUS  
STATE SUPPORTED  
ACADEMIC YEARS 1987-88 TO 1991-92**

**Teaching Faculty:** The number of teaching faculty reached its highest level in a decade in 1991-92. With the growth of part-time faculty in 1991-92, the full-time/part-time faculty mix declined to 55 percent of all annual FTE-faculty being full-time and 45 percent part-time. Part-time faculty give community colleges the flexibility to offer courses outside the expertise of full-time faculty, to offer more evening and off-campus courses, and to adjust course offerings quickly in response to student demand or changes in funding.

In addition to teaching faculty, some 311 FTE for counselors, librarians and teaching faculty on release time for course development, administration and student support were employed in 1991-92.

## FULL-TIME FACULTY SALARY PEER COMPARISON ACADEMIC YEAR 1991-92

The average salary for full-time faculty in Washington community colleges was \$35,019 in 1991-92. These salaries represent a gain in real purchasing power compared with 1987-88 salaries.

### 1991-92 PEER DATA COMPARISON (Constant Dollars)

### AVERAGE SALARY

	1987-88	1988-89	1989-90	1990-91	1991-92
<b>WASHINGTON</b>					
REAL \$	\$29,267	\$29,717	\$31,435	\$33,131	\$35,019

% CHANGE	0.6%	3.4%	-1.4%	3.8%	6.7%

Note: Constant dollar amount based on 1991-92. See page 44 for Index.

The community college system spent \$162.8 million in 1991-92 on community college faculty salaries and benefits. This included \$124.9 million for full-time faculty salaries and benefits and \$37.9 million for part-time faculty salaries and benefits. In 1991-92, total community college faculty salaries and benefit expenditures represented 48.2 percent of total system expenditures.

### FACULTY EXPENDITURES (\$ in Millions)

	1987-88	1988-89	1989-90	1990-91	1991-92

## **FACILITIES**

## INTRODUCTION TO FACILITIES AND CAPITAL FUNDING

The facilities which house Washington's community and technical colleges include more than 12 million square feet of space located on 2,879 acres. Three-fourths of community and technical college facilities were built before 1975, and one-third date from 1965 or earlier. Many of these now need repair and renovation, and some are also functionally obsolete.

Until 1991, technical colleges had been dependent upon the decisions of local school boards for their capital improvements. As a result, their facilities vary greatly in terms of age and extent of renovation.

From 1967 to 1977, the community colleges received capital funds based on the funding capacity of student building fees. By 1977, the state had fully committed these revenues to debt service. Since then the colleges have relied on a share of the state's general obligation (G.O.) bonding capacity. Community colleges received relatively little of these funds until 1985 when the governor recommended a six-year plan for major capital support of the system. Under that plan, the 27 colleges received \$69 million, \$75 million and 65 million through 1989-91. In 1991-93, \$108 million was appropriated for the community college system and the five technical colleges.

System objectives for the capital program include the following:

- To make repairs needed to prevent facility deterioration and loss of use;
- To renovate older facilities that are inadequate, deteriorated, or functionally obsolete;
- To make minor remodeling improvements for better use of existing space;
- To purchase land and facilities or to construct small additions and major projects as outlined in the community college capital plan.

From 1995 on the number of high school graduates will increase dramatically, creating severe enrollment growth pressure on basic classroom and laboratory spaces at community and technical colleges. Funds will be needed to expand the capacity of the colleges and to renovate existing facilities.

## FACILITIES INVENTORY SUMMARY

Community and technical college facilities are as varied as the system's educational programs. Most buildings are state owned, but some are leased; most buildings are on campuses, some are in the many off-campus locations around the state. More than 40 percent of the state-owned space was built between 1966 and 1975; nearly one-third is pre-1966 construction.

State appropriations for community and technical college capital expenditures must serve a number of competing needs. First priority goes to health and safety improvements, followed by other necessary repairs. Of lower priority are renovations, alterations and new space -- both minor (less than \$500,000) and major projects.

In 1991-92, nine new facilities or additions came on-line including major structures of 13,000 gross square feet at Centralia College (vocational building); 46,376 gross square feet at Spokane Community College (business technology building); and 26,085 gross square feet at Walla Walla Community College (agricultural technology building).

## APPROPRIATIONS OF CAPITAL FUNDS

### Prioritizing Needs

After each college board of trustees develops the facilities requests for its campus, the State Board for Community and Technical Colleges prioritizes the repairs, minor improvements and major projects of all college districts. The State Board's model evaluates characteristics of proposed minor and major projects for each two-year budget request and the six-year plan to prioritize the projects to be recommended to the governor and the legislature. The success of this internal prioritizing of the broad range of college needs is largely dependent upon the continuation of adequate capital funding.

The State Board allocates capital funds in five categories:

- Major Projects: Appropriations for construction of major new facilities or renovations (projects over \$500,000). Includes predesign, construction and equipment purchase costs, and purchases of property.
- Minor Improvements: Renovation, additions and alterations and purchases costing less than \$500,000. The majority of these projects relate to renovation or additions to instructional space, primarily for vocational education, fine arts, and science.
- Repairs: Corrections of failed facility elements or components. Includes repairs of roofs, sealing of exterior walls, repair or replacement of heating/ventilation/air conditioning systems, and replacement of obsolete electrical elements, unpaved walks, and floor coverings.
- Small Repairs and Improvements (RMI): Appropriations to each college, based on enrollment and facilities, for use in meeting minor facility emergencies, doing repairs or major maintenance, and making minor improvements, amounting to less than 25 cents per square foot of building space per year.
- Acquisitions: Purchases of real property, improved or unimproved, to enhance college facilities or to reduce long-term lease costs.

## EXPENDITURES

**STATE EXPENDITURES  
COMMUNITY AND TECHNICAL COLLEGES  
ACADEMIC YEAR 1991-92**

**FINANCE**

The total state expenditures for the community and technical college system was \$377 million in 1991-92.

**Total State Expenditures**

Technical Colleges	\$ 39,228,733
Community Colleges (State and Local)	337,795,902
Total State Expenditures	\$377,024,635

**Community Colleges:** Current authorization is for community colleges to enroll 87,400 state-supported annual FTEs which includes FTEs in literacy programs. One FTE is equivalent to 45 credits of instruction during a year. The colleges are funded at \$3,551 per FTE.

In addition to their state-funded courses, community colleges contract to provide training at correctional and military facilities, customized training for employers, and college avocational courses for the general public on a self-supporting basis. Community colleges were also authorized to enroll a limited number of FTEs above their state-funded level and retain the tuition to cover the cost of these "excess enrollments." The 1991-92 limit was set at 4,359 FTEs.

**Technical Colleges:** The Washington Legislature authorized the technical colleges to enroll 12,655 FTEs in vocational programs and literacy training in fiscal year 1991-92. For technical colleges, one FTE is equivalent to 900 hours of instruction during a year. Technical colleges are funded at the rate of \$3,408 per vocational FTE and \$1.62 per hour of literacy training. Technical colleges have authority to set and retain tuition to fund instruction.

In addition to offering state-funded vocational and literacy education, technical colleges provide customized training for employers and avocational courses for the general public on a self-supporting basis.

Detail on technical college expenditures are not available.

## COMMUNITY COLLEGE EXPENDITURES

### Community College Expenditure Categories

Expenditure categories include the state general fund, grants, and local revenue sources such as fees for courses funded exclusively from student fees (student-funded courses). There is no local tax support for Washington community colleges. Expenditures exclude auxiliary enterprise funds such as those used to run the campus book store or cafeteria.

The expenditures are reported by fund, program and element (sub-program), and object (types of things purchased such as salaries, benefits, equipment, and travel). The four funds included are:

**State General Fund (001):** State tax dollars and student operating fees deposited in the general fund and appropriated by the legislature to the community colleges.

**Local General Fund (149):** Unrestricted local funds consist primarily of interest income earned on student fees by the colleges before the fees are remitted to the state. Also included are general fees and fines imposed by colleges. The legislature reduces state general fund appropriations by an amount equal to assumed local general fund expenditures. (Not Appropriated)

**Local Dedicated Fund (148):** Consists primarily of fees for student-funded courses not funded by the state; lab, course, and other fees established for specific purposes; and income generated from instructional enterprises, such as food service and auto repair courses. This income is reinvested to support the instructional program. (Not Appropriated)

**Grants and Contracts (145):** Funds received from governmental or private sources dedicated for specific restricted purposes. Federal grants and contracts, including vocational education funds, make up the major portion of revenues. Also included are revenues from contract courses. (Not appropriated)

### Constant Dollar Calculations

Historical fiscal data is presented both in real and constant dollars. Constant dollars provide a measure of "real" increases or decreases in funding, as opposed to inflationary increases represented by the real dollar value. Constant dollars were calculated using the "implicit price deflator" adjusted to fiscal years rather than calendar years. The following index numbers were used:

Fiscal Year	Index
1987-88	.845
1988-89	.880
1989-90	.916
1990-91	.956
1991-92	1.000

Source: 91-93 OFM Budget Instruction, Implicit Price Deflator

## COMMUNITY COLLEGE EXPENDITURES BY SOURCE OF FUNDS GENERAL AND DEDICATED

The community college system spent \$407,791,849 of operating funds in fiscal year 1992. State and local funds declined 2.9 percent from fiscal 1991 to fiscal 1992 in constant dollar value. The growth for the same period was much greater for dedicated local funds (48.5 percent) and grants and contracts (6.7 percent). The change in dedicated local funds reflects the recent authorization for colleges to retain and expend tuition dollars for a limited number of students above their state limit. Federal vocational expenditures and reimbursements pass through Fund 145, Grants and Contracts, as interagency reimbursements and do not affect fund expenditure totals.

# EXPENDITURES BY SOURCE OF FUNDS BY DISTRICT GENERAL AND DEDICATED

Expenditure patterns by college vary as a result of: college size; faculty mix in terms of part-time/full-time status; program mix and the equipment and consumable costs related to instruction; faculty salary schedules; and the age of the physical plant and related utility and maintenance costs. Tuition revenue retained by colleges under the allowed "excess enrollment" and for summer self-support is listed under Dedicated Local Funds (148).

**PER STATE FUNDED FTES  
GENERAL STATE AND LOCAL – FUNDS 001 AND 149**

In terms of constant dollars per FTE, expenditures decreased by 6.9 percent from fiscal year 1991 to 1992 as colleges served more students with fewer dollars per FTE. The fiscal year 1992 constant dollar per FTE expenditure is 4.7 percent higher than it was five years ago.

Fiscal Year	General State/Local Funds (001 & 149)		Actual Annual Average State* FTES	State/Local Funds Expenditures per FTE

\* Excludes excess enrollments in 1991-92.

**EXPENDITURES BY PROGRAM**  
**GENERAL STATE AND LOCAL – FUNDS 001 AND 149**

For every dollar spent in 1991-92 on direct instruction, libraries and academic support, 18 additional cents were spent on student services which include counseling, advising, assessment testing, and special programs designed to retain minority students, women students entering college after raising a family, and students with disabilities. Also, 28 cents went to administration and 20 cents to plant maintenance and operation.

**EXPENDITURES BY OBJECT  
GENERAL STATE AND LOCAL – FUNDS 001 AND 149**

Salaries and benefits were the largest expenditures in the community college system (83 percent of all expenditures).

Fiscal Year 1992

<u>Object</u>	<u>Expenditure</u>	<u>Object</u>	<u>Expenditure</u>
A Salaries and Wages	\$240,226,487	K Equipment (non-capital)	\$3,927,916
B Employee Benefits	61,221,004	N Grants and Subsidies	202,896
C Personal Services	287,072	P Interest Expenses	1,930,507
E Goods and Services	47,041,415	S Interagency Reimbursement	(10,216,032)
G Travel	2,623,636	T Transfer of Charges	(16,261,574)
J Equipment (capitalized)	6,833,774		

Note: Payments received from the Department of Corrections, federal vocational funds, and adult literacy grants are reflected in object "S", Interagency Reimbursements. See Appendix D for definitions of all object codes. Percents are net of the impact of Interagency Reimbursements and Transfer of Charges.

**FEDERAL VOCATIONAL FUNDS  
ACADEMIC YEAR 1991-92**

The Carl D. Perkins Vocational and Applied Technology Education Act of 1990 provides federal assistance to secondary, post-secondary, and adult vocational education programs. "It is the purpose of this Act to make the United States more competitive in the world economy by developing more fully the academic and occupational skills of all segments of the population. This purpose will principally be achieved through concentrating resources on improving educational programs leading to academic, occupational, training and re-training skill competencies needed to work in a technologically advanced society." These federal dollars represent a small percentage of the total dollars available for vocational education programs. The major objectives are to assure participation by special populations and continual program improvement for all vocational education programs.

\*\* Estimate

**Title II-C of the Perkins Act (Basic State Grants)** provides funding for activities which include professional development, curriculum development and dissemination and assessment of programs receiving federal assistance. Recipients may only use funds for program improvement, with the full participation of special populations.

**Title III-B of the Perkins Act (Consumer and Homemaking Education)** provides funds to conduct consumer and homemaking education programs. Activities include instructional programs, services, and activities that prepare youth and adults for the occupation of homemaking; and instruction in the areas of food and nutrition, individual and family health, consumer education, family living and parenthood education, child development and guidance, housing, home management (including resource management), and clothing and textiles.

**FEDERAL VOCATIONAL FUNDS**  
**ACADEMIC YEAR 1991-92**  
(Continued)

**Title III-B of the Perkins Act (Single Parent, Sex Equity, Displaced Homemaker)** may be provided to secondary or post-secondary institutions, or community-based organizations. Funds are administered by the state sex equity specialist and distributed on a competitive basis. During FY 1992, Washington received \$1.6 million.

**Title III-E of the Perkins Act (TECH PREP Education)** provides funds for the development and operation of four-year programs designed to provide a TECH PREP education program leading to a two-year associate degree or a two-year certificate or apprenticeship. These programs are designed to offer strong comprehensive links between secondary and post-secondary educational institutions. Washington State allocates TECH PREP funds on a competitive basis to consortia comprised of business, labor, community, government, and secondary and post-secondary institutions. Grant awards are dispersed to fiscal agents of the consortia which in this state is identified as a community or technical college. In FY 1992, Washington received approximately \$1.1 million for distribution from the U.S. Department of Education. Five percent of this statewide allocation has been earmarked for state administration.

**FEDERAL VOCATIONAL FUND ALLOCATIONS BY DISTRICT  
ACADEMIC YEAR 1991-92**

Federal vocational funds are allocated to community and technical college districts based on their percentage of vocationally enrolled Pell Grant recipients and recipients of assistance from the Bureau of Indian Affairs. College districts submit local plans for their allocation before funds are awarded. Prioritized programs must be of sufficient size, scope and quality, have integrated academics in a coherent sequence of courses and provide full participation to all special population persons to be effective in achieving the objectives under this part of the Act.

**Final Allocation of FY 1992 Federal Vocational Funds**

**APPENDIX A**

**FULL-TIME UNDERGRADUATE STUDENT**

**TUITION AND FEES**

## APPENDIX A

### TUITION AND FEES PER QUARTER REQUIRED BY STATUTE

Technical Colleges: Technical colleges are free to set fees on a program-by-program basis. Thus no single fee structure exists. The typical full-time student, however, paid about \$900 for a year of instruction in 1992-93. Technical colleges do not charge higher fees to non-residents.

Community Colleges: The state legislature establishes the tuition rate for community colleges such that tuition equals 23 percent of the cost of instruction. Tuition revenues generated from the budgeted enrollment level are deposited in the state general fund. Revenues from enrollments above the budgeted amount are retained by the colleges. Students enrolled in certain programs such as apprentice-related training and industrial first aid pay lower tuition charges. Additionally, Vietnam and Persian Gulf veterans pay reduced rates.

The overall charge to students for enrollment in community college education is made up of tuition and the services and activities fee. Tuition consists of two parts: the building fee, tuition which is dedicated to the support of capital construction, and the "operating fee," which goes into the state's general fund. Services and activities fees are not budgeted at the state level, but are retained locally and used for student activities and programs.

#### Washington Community Colleges Academic Years 1989-90 Thru 1991-92

Type of Institution	Quarterly Tuition & Fees	1990-91		1991-92		1992-93

Note: Student headcount data by state and contract funding sources not available prior to fall quarter, 1976. Student-funded headcount in summer 1991 includes summer self-support.

**APPENDIX C**  
**LIST OF STATISTICAL PUBLICATIONS**

# **APPENDIX C** **LIST OF STATISTICAL PUBLICATIONS**

The Academic Year Report, which was previously titled "Factbook," is one of two annual informational and reference publications prepared by the State Board for Community and Technical Colleges. The second is the Fall Report, which is published in January of each year. The table below describes the statistical publications relating to each academic year since 1975-76:

<u>Academic Year 1975-76</u>	<u>1st Publication Containing Data for this Time Period:</u>	<u>Date Published</u>
Fall Quarter 1975 Data	Factbook 1977	Jan. 1977
Academic Year 1975-76 Data	Factbook 1977	
<u>Academic Year 1976-77</u>		
Fall Quarter 1976 Data	Factbook, Addendum A, Student Enrollment, 1976-77	Oct. 1977
Academic Year 1976-77 Data	Factbook, Addendum A, Student Enrollment, 1976-77	
<u>Academic Year 1977-78</u>		
Fall Quarter 1977 Data	Factbook, Addendum A, Student Enrollment, 1977-78	Sept. 1978
Academic Year 1977-78 Data	Factbook, Addendum A, Student Enrollment, 1977-78	
<u>Academic Year 1978-79</u>		
Fall Quarter 1978 Data	Factbook 1979	Feb. 1979
Academic Year 1978-79 Data	Factbook, Addendum A Student Enrollment, 1978-79	Jan. 1980
<u>Academic Year 1979-80</u>		
Fall Quarter 1979 Data	Factbook 1980	Feb. 1980
Academic Year 1979-80	Factbook, Academic Year 1979-80	June 1981
<u>Academic Year 1980-81</u>		
Fall Quarter 1980 Data	Fall Quarter Report 1980	Feb. 1981
Academic Year 1980-81 Data	Factbook, Academic Year 1980-81	Jan. 1982

AYR 1991-92

# APPENDIX C: LIST OF STATISTICAL PUBLICATIONS (Continued)

<u>Academic Year 1981-82</u>	<u>1st Publication Containing Data for this Time Period:</u>	<u>Date Published</u>
Fall Quarter 1981 Data	Fall Quarter Report 1981	Mar. 1982
Academic Year 1981-82 Data	Academic Year Report 1981-82	Feb. 1983
<u>Academic Year 1982-83</u>		
Fall Quarter 1982 Data	Fall Quarter Report 1982	Mar. 1983
Academic Year 1982-83 Data	Academic Year Report 1982-83	Dec. 1983
<u>Academic Year 1983-84</u>		
Fall Quarter 1983 Data	Fall Quarter Report 1983	Mar. 1984
Academic Year 1983-84 Data	Academic Year Report 1983-84	Nov. 1984
<u>Academic Year 1984-85</u>		
Fall Quarter 1984 Data	Fall Quarter Report 1984	Mar. 1985
Academic Year 1984-85 Data	Academic Year Report 1984-85	Mar. 1986
<u>Academic Year 1985-86</u>		
Fall Quarter 1985 Data	Fall Quarter Report 1985	Mar. 1986
Academic Year 1985-86 Data	Academic Year Report 1985-86	Oct. 1986
<u>Academic Year 1986-87</u>		
Fall Quarter 1986 Data	Fall Quarter Report 1986	Mar. 1987
Academic Year 1986-87 Data	Academic Year Report 1986-87	Sept. 1987
<u>Academic Year 1987-88</u>		
Fall Quarter 1987 Data	Fall Quarter Report 1987—Recap	Mar. 1988
Academic Year 1987-88 Data and Fall Quarter 1987 Data	Academic Year Report 1987-88 and Fall Quarter Report 1987	Oct. 1988
Student Survey, Winter 88	Current Student Survey, Winter 1988	Apr. 1988

## APPENDIX C: LIST OF STATISTICAL PUBLICATIONS (Continued)

<u>Academic Year 1988-89</u>	<u>1st Publication Containing Data for this Time Period:</u>	<u>Date Published</u>
Fall Quarter 1988 Data	Fall Quarter Report 1988	Mar. 1989
Academic Year 1988-89 Data	Academic Year Report 1988-89	Apr. 1990
Spring 1988 Bachelor's Degree Survey	A Study of the Role of Community Colleges in the Achievement of the Bachelor's Degree in Washington, Operation Report No. 89-1	Jan. 1989
"General" Students	Reasons Why "General" Students Attend Washington Community Colleges, Operation Report No. 89-2	June 1989
<u>Academic Year 1989-90</u>		
Fall Quarter 1989 Data	Fall Quarter Report 1989	Feb. 1990
Academic Year 1989-90 Data	Academic Year Report 1989-90	Sept. 1990
Video Telecommunications in Washington Community Colleges	A Description Study of the Current Activities and Future Plans, Operations Report 90-1.	June 1990
<u>Academic Year 1990-91</u>		
Fall Quarter 1990 Data	Fall Quarter Report 1990	Mar. 1991
Academic Year 1990-91 Data	Academic Year Report 1990-91	Sept. 1991
Vocational Outcomes in: Washington Community Colleges	A Baseline Report on Vocational Student Outcomes, Operations Report 90-2	Oct. 1990

Comments on the content and format of this document would be greatly appreciated.

## **APPENDIX D**

## **DEFINITIONS**

## APPENDIX D: DEFINITIONS

### DEFINITION OF FTE

Student FTE: One annual FTE is the equivalent of one student enrolled for 45 community college credit hours or 900 technical college contact hours in a year.

Staff FTE: One full-time equivalent (FTE) staff member is defined as follows, based on staff type:

Faculty: Full-time assignment for nine months.

Administrative/Other Professional Staff: Full-time assignment for 12 months.

Classified Staff: Services are performed on the basis of 40-hours-per-week. An annual FTE is a full-time assignment for 12 months.

Annual Teaching Faculty (FTE-F): All instructional employees, whose main assignment is classroom teaching. The number of **Teaching Faculty FTE-F** represents the teaching, class preparation, student advising, and committee work of faculty. One FTE-F Teaching Faculty is equal to one instructional employee assigned to teach a full-time load of courses for nine months. A person assigned a half-time teaching load and a half-time load in a non-teaching area is counted as 0.50 FTE-F Teaching Faculty and 0.50 FTE-F Other Faculty.

Administrative/Other Professional Staff (FTE): Includes all administrators, management and related support staff who are exempt from the jurisdiction of the Higher Education Personnel Board civil service system. One annual FTE in this category is equal to a full-time assignment for 12 months.

Classified Employee (FTE): Civil service employees who work under a set of conditions determined by the Higher Education Personnel Board. One annual FTE employee is a classified employee whose service is performed on the basis of 40-hours-per-week for 12 months.

### DEFINITION OF FULL- AND PART-TIME STATUS (Community Colleges)

Full-Time Student: A student enrolled for 10 or more credits.

Part-Time Student: A student enrolled for fewer than 10 credits.

Full-Time Faculty: A person paid the full-time rate, regardless of the number of days worked, is considered a full-time faculty member.

Part-Time Faculty: A person who is paid on the part-time salary schedule is part-time. This includes hourly instructors, as well as the instructional effort of classified and non-faculty employees who teach beyond their regular workload.

Full-Time, Administrative/Other Professional or Classified Employees: A person whose services are required on a full-time basis (for a 40-hour work week) for any period from 9 to 12 months is considered full-time.

Part-Time, Administrative/Other Professional or Classified Employees: A person whose services are required for less than a 40-hour work week.

## STAFF TYPE

Moonlight: An instructional assignment in addition to a full-time assignment for faculty and administrative personnel (generally the teaching of evening courses by full-time day instructors).

## FUNDING SOURCE

State Supported: Courses funded completely or in part by legislative appropriations of state funds.

Excess Enrollment: FTEs of students enrolled above the state funded limit. Tuition is retained by the colleges.

Contract Supported: Courses funded by grants and contracts with external organizations.

Student Funded: Courses funded entirely through fees charged to the students enrolled in them.

## COURSE TYPE

Academic: Transfer and Vocational Support: Courses which provide the first two years of baccalaureate degree programs and which support vocational programs in such areas as math, science and English.

Vocational: Courses which prepare students for entry-level employment or provide retraining and upgrading for employed adults.

Basic Skills/Developmental Studies: Courses which (1) prepare students for college-level classes (developmental), (2) enable them to complete eighth grade (ABE) or high school, (3) help adults to overcome illiteracy, or (4) provide English proficiency to those whose native language is not English.

## FACILITIES

Gross Square Feet - Buildings: The sum of the enclosed floor areas of the building included within the outside faces of exterior walls for all stories.

Assignable Square Feet - Buildings: The sum of all areas on all floors of a building assigned to, or available for assignment to, an occupant, including every type of space functionally usable by an occupant (excepting those spaces defined in Appendix 6.5 as custodial, circulation, mechanical, and structural areas).

## FINANCE

The accounting processes of the community college system are based on generally-accepted governmental accounting principles in accordance with the rules and regulations published by the Office of Financial Management in its Policies and Procedures Manual.

The chart of accounts for the community college system is designed to provide consistency in the coding of all funds within the system. Recording of expenditures is achieved through a hierarchical system of funds, programs, and objects.

## **Programs**

**010 Instruction:** This program consists of the formal instructional activities provided for students.

**040 Primary Support Services:** This program consists of activities providing primary support to instruction. The three major elements are academic computing services, ancillary support services, and academic administration.

**050 Libraries:** This program consists of activities related to the retention and display of educational materials, including library-media staff and materials, needed to support the learning needs of the students.

**060 Student Services:** This program consists of social and cultural services and institutional management activities related directly to students, but which are not part of formal instruction.

**080 Institutional Support:** This program consists of activities related to the administration of the functions of the community college, excluding physical plant operations and maintenance.

**090 Plant Operation and Maintenance:** This program consists of activities related to the operation and maintenance of community college facilities, including utilities, janitorial services, and plant management.

## **Objects**

## **Definitions**

B	Salaries & Wages	Amounts paid to employees of institutions of higher education.
C	Personal Services	Amounts paid for consulting services rendered by independent contractors.
E	Goods & Services	Amounts expended for all materials and supplies ordinarily consumed or expended within one year.
G	Travel	Amounts paid to or for employees for lodging and/or subsistence expenses incurred while traveling on official business.
J	Equipment	Amounts paid for equipment additions and replacements regardless of the period of service or value.
L	Employee Benefits	Amounts paid as employee benefits.
N	Grants and Subsidies	Amounts expended for grants and subsidies received from other governmental units
P	Debt Service	Amounts expended for the payment of principal, interest, or other charges related to the various forms of indebtedness.
R	Capital Outlays	Amounts paid for land and building acquisitions (including construction) and related capital projects charges.
S	Interagency Reimbursements	Payments received from other agencies for services or materials furnished.
T	Transfers	The reallocation of budgeted expenditures within an agency by transfers between budgeted programs and/or capital
